We did lots of activities about the mallee fowl. This included:

- Sequencing the life cycle of the mallee fowl.
- Discussing the bird itself. We asked lots of what and why questions. Things like – Why is it the colour it is? What would the shape of its beak be good for? What could it do with its sharp claws? Is its tail used for anything special?

We also played a really fun game about feral animals that endanger the mallee fowl. Some of us got to dress up as a feral cat or feral goat. We had to quickly get into a hoop before the feral animals could get us but we were only allowed 2 mallee fowls in a hoop – we were the mallee fowls!
